

NIEVES ALONSO GILSANZ

Last-year student of video game development equipped with a deep love for videogames eager to start working in the game industry and make my mark. By participating in game jams and working on both university and personal projects, I have gained experience working with and coordinating development teams, holding roles as a gameplay programmer, UI/UX programmer, game-flow programmer and engine programmer.

With a solid foundation in artistic knowledge, thanks to my experience as a visual development artist, painter and illustrator, I have been able to develop as a technical artist allowing me to work as a bridge between programmers and artists in development teams.

I approach programming as a creative tool for bringing worlds to life through my code.

Education

Bachelor's Degree in Videogame Development

Universidad Complutense de Madrid (UCM), Spain

Sept. 2022 - Present

Baccaulerate in Science and Technology

IES Pintor Antonio López, Madrid, Spain

2020 - 2022

Skills

Languages

C++
C#
C
GDScript
HLSL
GLSL

Engines

Unity
Godot

Version control

Git/Github

Libraries

SDL
OpenGL
PhysX
OGRE
Dear ImGui
sol2

Art & Design

Krita
Figma
Blender
GIMP
Audio
FMOD

Soft Skills

Team planning
Organization
Intellectual curiosity
Creativity
Adaptability
Perseverance

Projects

CHAVALES Engine

Data-driven EC game engine written in C++ for Windows.

Roles: Utils programmer, Core Engine programmer, Serialization programmer

Using: C++, C, lua, SDL, PhysX, OGRE, Dear ImGui, sol2, TOML

Jan. 2026 - May 2026

TIRABOLAS

Arcade-like videogame developed in CHAVALES Engine, gameplay written in C++ and scene serialization in Lua.

Roles: Main programmer, Game designer, UI designer

Using: C++, lua

May 2026

NormalPaint

Real-time 3D texture (albedo & normal map) painting software prototype, made with Godot.

Roles: Main programmer, Technical artist

Using: Godot, GDScript, GLSL

June 2026

MÓDULO ESPACIAL CHLADNI

2D physical simulation videogame of the Chladni plates experiment, made with Unity & FMOD.

Roles: Main programmer, Game designer, Audio & UX engineer

Using: Unity, C#, FMOD

Dec. 2025
